## Measure Factory Benefits

**Automated Rules Engine:** Discover unparalleled accuracy and consistency in your data with Measure Factory's automated rules engine. This advanced technology minimizes manual errors and standardizes data processing, leading to trustworthy and dependable data insights for your hospital.

**Trust and Transparency in Data Handling:** Build a foundation of trust in your hospital's data governance. Measure Factory ensures transparent and understandable business rule definitions, bolstering confidence among stakeholders and decision-makers.

**The Perfect Add-On:** Enhancing Your Existing Systems Measure Factory effortlessly integrates with Dimensional Insight's Gateway Platform, enhancing your hospital's existing data systems. This synergy optimizes data management without the need for extensive system overhauls, ensuring a smooth transition to advanced analytics.

## Measure Factory Advantages

### Business Intelligence

- Easy to maintain
- Reusable code
- Ensures consistent definitions
- Off-the-shelf measures

### Dashboard Displays

- Self-service display creation
- Select the data, chart style & post
- Off-the-shelf display

### Automatic Analytics

- Data is "diveable"—not static
- Unique screen for each measure
- Users answer their own questions

### Governance

- Integrated data governance via definition collaboration
- Creates data integrity & trust
- Retains collaborative history

## How Your Organization Can Benefit from Measure Factory

**Meet organizational goals with streamlined KPIs:** With clear KPI definitions available throughout the organization, everyone will be on the same page with cohesive measures for operational, financial, and clinical goals.

**Strengthen data governance and management:** Measure Factory gives you access to standardized measures, enhanced data governance, and helps ensure accuracy and quality of care.

**Achieve consistency for clarity and collaboration:** Eliminate data discrepancies with clear KPI definitions to foster collaborative decisions, effective teamwork, and a single source of truth.

**Make confident decisions with trusted insights:** Gain unparalleled confidence in your data and save time on data guessing games. You'll be empowered to make timely, accurate decisions with trusted, data-driven insights.

**Figure 2.** As an add-on to the trusted data management of the Dimensional Insight Gateway Platform, Measure Factory provides automated business rules management, bringing data trust to a whole new level.

## The Bottom Line

**Consistency brings clarity: Pre-defined KPIs provide data trust for better decision-making.**

Measure Factory is a game-changer for hospitals looking to make the most of their data. It simplifies data management, automates complex business rules, and ensures that the information you use is accurate and trustworthy.

With easy integration into your existing systems, Measure Factory helps you make better, faster decisions for patient care and hospital operations.

Transform how your teams leverage data with automated, intuitive KPI rules management from Measure Factory.

See for yourself how centralized governance and transparency can lead to smarter decisions through analytics you can believe in.
