

DI Cloud™

Empowering your business with DI Cloud hosting services

Discover the ultimate cloud hosting solution for your Dimensional Insight implementation: DI Cloud. DI Cloud is tailored specifically to optimize performance of your Dimensional Insight software both on the back-end for data intake, ETL, and building of cBases, and on the front-end for end-user experience.

DI Cloud ensures top-tier security and compliance, freeing you from the complexities of IT overheads, such as network and storage infrastructure management. With DI Cloud, you'll experience the simplicity of a secure solution that handles everything from disaster recovery planning to physical environment concerns.

With DI Cloud, your business gains the flexibility to scale effortlessly. This means you can focus on growth and innovation, leaving the burdens of IT maintenance and resource provisioning to us. You'll enjoy a cost-effective, worry-free hosting solution that adapts to your evolving needs.

Why Choose DI Cloud?

DI Cloud is more than just a hosting solution; it's a commitment to excellence.

DI cloud provides secure server hardware and software configurations meticulously designed and optimized to support the Dimensional Insight Platform. With DI Cloud, you are guaranteed the highest quality of hosting services—a secure and robust environment specifically tailored for your Dimensional Insight analytics solution.

Why Host with Us?

DI Cloud is the best environment for Dimensional Insight software. This should be no surprise because after all, we wrote the software and have the best understanding of how to host it well.

DI Cloud offers cost certainty with upfront pricing as opposed to surprise billing after the fact, as is common with most 3rd-party cloud services. Don't get caught with an unexpected invoice.

Advantages of DI Cloud:

- ❑ Has a proven track record of over 20 years
- ❑ Offers subscribers easy access to Dimensional Insight technical experts
- ❑ Offers subscribers transparent, predictable, and consistent pricing

Key features of DI Cloud

Installation & maintenance of platform & OS

Robust and secure hosting environment

Constant monitoring with reliable backups

Dedicated technical support

Advanced server hardware

ISO 27000-certified data center

Redundant power, network & cooling

Cost-Saving Advantages

-  **Cost optimization**—There is less upfront cost. When it comes time to upgrade or purchase more hardware, you will not have to outlay the upfront cash needed for an onsite solution. Valuable staffing time can be used elsewhere as we do the work. Installation time disappears. Your staff won't spend time on upgrades.
-  **No future hardware expenses**—Dimensional Insight will maintain the Cloud environment and manage hardware resources.
-  **Lower energy costs**—When you move to the cloud, you no longer pay to power on-premise servers or maintain their environments.
-  **Risk reduction**—Long-term outages can cost hundreds of thousands of dollars in some cases. We take the risk while you relax without hardware failure worries.
-  **Business innovation**—It is expensive and time-consuming to build testing and development infrastructure in-house and to maintain those environments over with. With Dimensional Insight responsible for these duties, it lowers barriers to entry for innovation and prototyping.
-  **Shorter project times**—Time is money. Having Dimensional Insight do the hosting has our software and hardware experts working for you. This frees your staff to focus on the business at hand—what you do best.
-  **Enhanced productivity**—Your staff does not have to do the heavy lifting and is freed up for other tasks

Technology—DI Cloud is offered as a single-tenant solution on Linux, providing isolated processes, storage, and networking. The DI Cloud services offer options for virtual private networking, high availability, long-term backups, and customized multi-site disaster recovery solutions. Offloading the responsibility for the configuration and operation of servers, storage, the network, and data centers allows you to focus staff time on important business objectives.

Scalability—Dimensional Insight will set up your platform to scale with ease. This means fewer man-hours for you. Initial site configuration and pricing are based on the approximate hardware resources needed, as agreed upon up-front. We do not charge by the byte transferred, or for the seconds of CPU consumed. Such

detailed accounting is a stress you do not have to worry about with our offering. This eliminates surprise invoices and provides cost certainty.

Availability—The service is up and monitored by Dimensional Insight staff 24x7 (minus scheduled maintenance windows).

Support—By using DI Cloud, we will be supporting both your hosting services and Dimensional Insight platform implementation. It provides a single point of contact for technical issues with either software or infrastructure. And by hosting, Dimensional Insight technical support staff have better access to your software implementation, leading to faster turnaround times for any support issues.

The Bottom Line

We know Dimensional Insight technology is the driver for our customers' important business decisions. Many rely on it as a critical part of their operations. With DI Cloud, Dimensional Insight has a solution to best meet your Dimensional Insight platform hosting needs.

See our customer ratings in analyst research

Dimensional Insight consistently ranks as a top-performing analytics organization by customers and industry analysts in its core market segments including healthcare, manufacturing, and beverage alcohol.
